Notes:

- Factors should be applied to the deferred pension including revaluation to the date of early retirement. The amount of revaluation should be determined for the relevant period in a manner consistent with Schedule 7 to the Pensions Act 2004 and associated regulations.
- Factors are shown for age exact at date of retirement.
- For intermediate ages factors should be obtained by linear interpolation for that NPA
- Ages should be determined in complete years and months rounded to the nearest whole month.
- Separate factors are available for application to lump sums where the lump sum is a separate entitlement from pension under the scheme.
- These factors will be reviewed from time to time and may be changed without notice.
