Notes:

- Factors should be applied to the deferred lump sum including revaluation to the date of early retirement. The amount of revaluation should be determined for the relevant period in a manner consistent with Schedule 7 to the Pensions Act 2004 and associated regulations.
- Factors are shown for exact term to Normal Pension Age.
- For intermediate terms factors should be obtained by linear interpolation
- Term should be determined as the remaining period from age at early retirement age in complete years and months rounded to the nearest whole month to NPA.
- Separate factors are available for application to periodic compensation.
- These factors will be reviewed from time to time and may be changed without notice.
