## **Notes:**

- Factors should be applied to the lump sum revalued to the later of Normal Pension Age (NPA) and Age at Assessment Date (AD).
- Factors are shown for exact term from NPA or Age at AD.
- For intermediate terms, factors should be obtained by linear interpolation.
- Term should be determined as the period from NPA or Age at AD to late retirement age in complete years and months rounded to the nearest whole month.
- Separate factors are available for application to periodic compensation.
- These factors will be reviewed from time to time and may be changed without notice.
