

PPF 7800 Index 31 January 2021

This update provides the latest estimated funding position, on a section 179 (s179) basis, for the defined benefit pension schemes potentially eligible for entry to the Pension Protection Fund (PPF). A scheme's s179 liabilities represent, broadly speaking, the premium that would have to be paid to an insurance company to take on the payment of PPF levels of compensation. This compensation may be lower than full scheme benefits.

Highlights

- The aggregate deficit of the 5,318 schemes in the PPF 7800 Index is estimated to have decreased over the month to £65.0 billion at the end of January 2021, from a deficit of £86.4 billion at the end of December 2020.
- The funding ratio increased from 95.5 per cent at the end of December 2020 to 96.5 per cent.
- Total assets were £1,808.4 billion and total liabilities were £1,873.4 billion.
- There were 3,149 schemes in deficit and 2,169 schemes in surplus.
- The deficit of the schemes in deficit at the end of January 2021 was £212.4 billion, down from £230.3 billion at the end of December 2020.

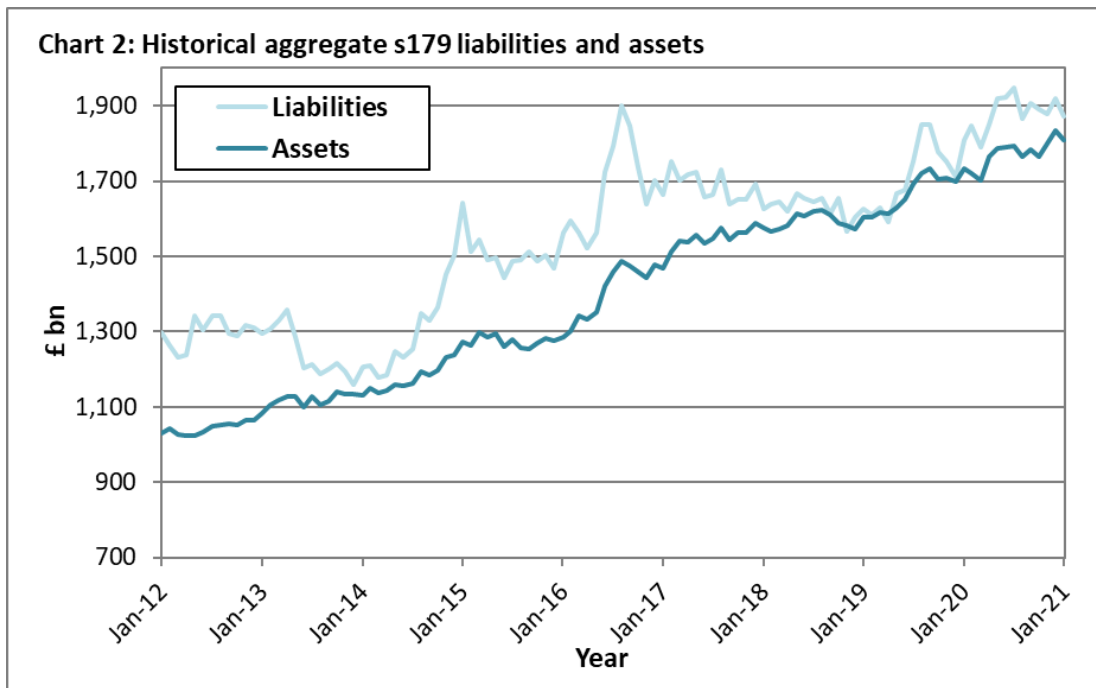

For a more in-depth look at the monthly changes to our data please see the link to the supporting data on the 7800 Index home page: <https://ppf.co.uk/ppf-7800-index>

The schemes in the universe

The aggregate deficit (total s179 liabilities less total assets) of the schemes in the PPF 7800 Index is estimated to have decreased to £65.0 billion at the end of January 2021, from £86.4 billion at the end of December 2020. The position has improved from a year ago, when a deficit of £74.7 billion was recorded at the end of January 2020.

The funding ratio (assets as a percentage of s179 liabilities) of schemes increased over the month from 95.5 per cent to 96.5 per cent at the end of January 2021. The funding ratio is higher than the 95.9 per cent recorded in January 2020.

Within the Index, total scheme assets amounted to £1,808.4 billion at the end of January 2021. Total scheme assets experienced a decrease of 1.4 per cent over the month and an increase of 4.3 per cent over the year. Total scheme liabilities were £1,873.4 billion at the end of January 2021, a decrease of 2.5 per cent over the month and an increase of 3.6 per cent over the year.

Funding comparisons

	January 2020	December 2020	January 2021
Aggregate funding position	-£74.7bn	-£86.4bn	-£65.0bn
Funding ratio	95.9%	95.5%	96.5%
Aggregate assets	£1,733.9bn	£1,834.1bn	£1,808.4bn
Aggregate liabilities	£1,808.6bn	£1,920.5bn	£1,873.4bn
Dataset / Assumptions	Purple 19 / A9	Purple 20 / A9	Purple 20 / A9

Schemes in deficit and surplus

The aggregate deficit of all schemes in deficit at the end of January 2021 is estimated to have decreased to £212.4 billion from £230.3 billion at the end of December 2020. At the end of January 2020, the equivalent figure was £209.9 billion.

At the end of January 2021, the total surplus of schemes in surplus increased to £147.4 billion from £143.9 billion at the end of December 2020. At the end of January 2020, the total surplus of all schemes in surplus stood at £135.2 billion.

The number of schemes in deficit at the end of January 2021 decreased to 3,149, representing 59.2 per cent of the total 5,318 defined benefit schemes. There were 3,206 schemes in deficit at the end of December 2020 (60.3 per cent) and 3,257 schemes in deficit at the end of January 2020 (60.1 per cent).

The number of schemes in surplus increased to 2,169 at the end of January 2021 (40.8 per cent of schemes) from 2,112 at the end of December 2020 (39.7 per cent). There were 2,165 schemes in surplus at the end of January 2020 (39.9 per cent).

Schemes in deficit (surplus)

	January 2020	December 2020	January 2021
Number of schemes in deficit	3,257	3,206	3,149
Deficit for schemes in deficit	£209.9bn	£230.3bn	£212.4bn
Number of schemes in surplus	2,165	2,112	2,169
Surplus for schemes in surplus	£135.2bn	£143.9bn	£147.4bn
Number of schemes in Universe	5,422	5,318	5,318
Dataset / Assumptions	Purple 19 / A9	Purple 20 / A9	Purple 20 / A9

**Note: The red bars indicate months in which we made changes to the actuarial assumptions used to value schemes on an s179 measure. The most recent change was made in November 2018 and implemented in the end of November 2018 PPF 7800 Index. This served to reduce the number of schemes in deficit by 437 (8.0 per cent).*

Understanding the impact of market movements

Equity markets and gilt yields are the main drivers of funding ratios. S179 liabilities are sensitive to the yields available on a range of conventional and index-linked gilts. Liabilities are also time-sensitive in that, even if gilt yields were unchanged, scheme liabilities would increase as the point of payment approaches.¹

The value of scheme assets is affected by the change in prices of all asset classes, but owing to the volume invested and the volatility, equities and bonds are the biggest drivers behind changes; bonds have a higher weight in asset allocation, but equities tend to be more volatile.

The following table sets out the changes in s179 liabilities and assets, and some key market indicators, in the month and year to 31 January 2021. The changes in s179 liabilities and assets:

- in the month to 31 January 2021 are the result of market movements.
- in the year to 31 January 2021 are the result of market movements and the impact of the updated dataset.

See Note 6 for further information.

¹ This effect amounts to around 0.1 per cent a month in the current environment.

	Change over the...	
	Month	Year
s179 liabilities	-2.5%	3.6%
Assets	-1.4%	4.3%
Market indicator		
10-year fixed interest gilt yield	14bps	-17bps
15-year fixed interest gilt yield	15bps	-17bps
20-year fixed interest gilt yield	15bps	-15bps
5-15 year index-linked gilt yield	13bps	-30bps
FTSE All-Share Total Return Index	-0.8%	-7.5%
FTSE All-World Ex-UK Total Return Index	-0.9%	13.8%

Notes

1. The PPF universe

The PPF covers certain occupational defined benefit pension schemes and defined benefit elements of hybrid schemes. For more information about eligible schemes see the PPF's website at:

<https://www.ppf.co.uk/your-scheme-eligible>

2. PPF compensation

For individuals who have reached their scheme's normal pension age or are already in receipt of a survivor's pension or pension on the grounds of ill health, the PPF will generally pay compensation at the 100 per cent level, i.e. these members will not see any reduction in retirement income when their scheme sponsor goes insolvent. For the majority of people below their scheme's normal pension age the PPF will generally pay compensation at the 90 per cent level. This is subject to a cap which is currently equal to £37,314.96 per annum at age 65, after the 90 per cent has been applied. Increases in future payments for members may not be as much as they would have been under their pension schemes. For more information about PPF compensation see the PPF's website at:

<https://www.ppf.co.uk/what-it-means-ppf>

3. s179: one of many different funding measures

s179 is one particular measure of funding. The change in the deficit of schemes in deficit on an s179 basis is an illustration of the impact of changes in financial markets on the PPF's total exposure. Schemes in surplus on an s179 basis at the time of insolvency usually do not enter the PPF. For more information please see our official s179 assumptions guidance at: <https://www.ppf.co.uk/sites/default/files/file-2018-11/s179-assumptions-guidance-a9-nov-2018.pdf>

In addition to s179, there are many different measures of a scheme's funding position. Among the other common measures are full buy-out (what would have to be paid to an insurance company for it to take on the payment of full scheme benefits), IAS19 or FRS17 (the measures used in UK company accounts), and Technical Provisions (that are used in the UK's scheme funding regime). The different measures can give very different levels of scheme funding at any point in time and move very differently over time.

4. Methodology

The figures shown throughout this document are based on adjusting the scheme valuation data supplied to The Pensions Regulator as part of the schemes' annual scheme returns, including Deficit Reduction Contribution certificates. This data is transformed on an s179 valuation basis at various dates using changes in market indices for principal asset classes. Conventional and index-linked gilt yields are used to value liabilities. The approximation does not allow for benefit accrual or outgo or actual scheme experience.

5. Estimating the impact of changes in market conditions on the PPF 7800 Index

We have developed a number of 'rules of thumb' to estimate the impact of changes in asset prices on scheme assets and s179 liabilities. A 7.5 per cent rise in equity markets boosts assets by 1.4 per cent while a 0.3 percentage point rise in gilt yields reduces scheme assets by 3.0 per cent. Meanwhile, a 0.3 percentage point rise in gilt yields reduces scheme liabilities by 5.8 per cent. The rules of thumb strictly speaking only apply to small changes from the 31 March 2020 level. For more information see Chapter 5 of the Purple Book 2020, available on the PPF's website at:

<https://www.ppf.co.uk/purple-book>

6. Moving to the Purple Book 2020 dataset

In November 2020 we moved to a dataset consistent with the Purple Book 2020 covering 5,318 schemes. The Purple Book 2020 dataset is estimated to include over 99 per cent of liabilities of PPF eligible schemes. The new dataset is based on a more up-to-date universe of schemes, excluding for example schemes that have entered PPF assessment, and it also uses more up-to-date funding information from the schemes in our universe. This is a standard procedure performed annually after the publication of the Purple Book. The impact of the change increased the funding ratio at 31 October 2020 by 2.1 percentage points (this figure can differ slightly depending on the date at which it is calculated) and improved the aggregate funding position by £42.2 billion. The aggregate funding position recorded as at 31 October 2020 was -£126.0 billion (93.3 per cent funded) compared with -£168.2 billion (91.2 per cent funded) using the old dataset.

The PPF 7800 is produced in accordance with the UK Statistics Authority Code for official statistics which came into force in February 2009.
